vianet

Private Network

SECURE CONTROLLED LOCAL INFRASTRUCTURE

Vianet's Private Network offers complete custom solutions catered to your business, allowing you to build and scale your network requirements while controlling the network experience end to end.

Power All Your Telecom Needs With A Private Network Solution

Network customization that keeps up with your changing needs. Delivering unique freedom to control and build your network experience from end to end. Private networks provide high levels of security, application customization, a path to data ownership and comprehensive performance using a variety of technologies.

## The benefits of using our custom private solution:

- Independent from public internet
- Locally hosted or via the cloud
- High levels of security
- Greater network control across all facilities
- VPN capable for your full control of work from home and multiple locations
- Network redundancy for reliability
- Traffic graphing tools available
